Senior Frontend Engineer with 20+ years of experience in software development, specializing in React, TypeScript, frontend architecture, and hands-on technical leadership. Experienced in modernizing legacy platforms, mentoring developers, and delivering scalable, user-focused products across international teams.

WORK

Nmbrs Reporting (Visma Group) — Netherlands

Contractor via Devoteam

SENIOR FRONTEND DEVELOPER

Oct 2025 - Present

- Serve as a key frontend technical reference across five engineering teams, contributing to architectural decisions, code reviews, mentoring, and engineering standards.
- Played a central role in the transition to Module Federation and architected the microfrontend host, integrating Vite and Rsbuild applications with shared layouts, routing, and Visma Connect authentication redirects.
- Modernize an eight-year-old React codebase through TypeScript migration, React Testing Library adoption, reusable components, and standardized frontend tooling.
- Reduced Vitest execution time by **67% (30 to 10 minutes)** across local development and CI pipelines.
- Improved application resilience through automated stale-cache recovery and collaborated with UI/UX designers to enhance interface consistency.

e-conomic (Visma Group) - Denmark

Contractor via Devoteam

SENIOR FRONTEND DEVELOPER

Oct 2024 - Oct 2025

- Acted as frontend technical lead within a team of three frontend and two full-stack developers, driving architecture, technology selection, code reviews, and mentoring.
- Helped build a new payroll solution from the ground up, delivering the initial PoC in **three months** and contributing to a production MVP.
- Developed reusable React components and hooks that influenced the evolution of e-conomic's Taco Design System.
- Established frontend engineering standards around Clean Architecture, SOLID principles, automated testing, and maintainability while collaborating with product and UI/UX teams.

Vodafone - UK

Contractor via Devoteam

SENIOR FRONTEND DEVELOPER & UI/UX DESIGNER

Jun 2023 - Oct 2024

- Acted as frontend technical lead within a six-developer team, driving architectural decisions, code reviews, mentoring, and engineering standards.
- Led the end-to-end redesign and modernization of internal field-engineering applications, covering UI/UX design in Figma, React implementation, usability testing, TypeScript migration, and an Ant Design-based design system.
- Built a reusable application boilerplate and shared component library, **reducing new application setup time by 90%** across five applications, while introducing automated testing and CI/CD practices.

viaPhoton INC - USA

Contractor

SENIOR FRONTEND DEVELOPER & UI/UX DESIGNER

Dec 2022 - May 2023

- Designed UI/UX interfaces for fiber optic and 5G CPQ, pricing, and 3D-enabled configuration tools, supporting a broader product initiative that streamlined quotation workflows from weeks or months to minutes.
- Developed the company's responsive WordPress website from provided designs.

SKY - UK

Contractor via Innowave

SENIOR FRONTEND DEVELOPER

Dec 2021 - Nov 2022

- Modernized React broadband applications through TypeScript migration, functional components, code splitting, and lazy loading.
- Implemented WCAG accessibility improvements and A/B testing variants using Dynamic Yield, collaborating with product and design teams.

Ponta Grande Resort - PT

Full-time (2018–2021) · Independent Consultant (2021–Present)

SENIOR FULL-STACK DEVELOPER & DESIGNER

Aug 2018 - Oct 2021

- Independently architected and developed a React/Django Members PWA integrating bookings, billing, credits, and member exchanges with the Aurora management system.
- Digitized administrative, marketing, and sales workflows, including lead management, scheduling, digital contracts, and recruitment tools.
- Delivered three major platform redesigns, most recently in October 2026, modernizing the frontend, backend, and administration interface.
- Resolved critical booking race conditions using Django atomic transactions and Celery, while introducing service monitoring, credit auditing, and improved credit visibility.

SKILLS / KNOWLEDGE

FRONTEND

React, TypeScript, JavaScript, Vite, Redux, Module Federation

ARCHITECTURE & LEADERSHIP

Microfrontends, Frontend Architecture, Design Systems, Code Reviews, Technical Mentoring

TESTING & DEVOPS

Vitest, React Testing Library, Playwright, Cypress, CI/CD, Azure DevOps, Git

BACKEND

Python, Django, Django REST Framework, PostgreSQL, Celery

DESIGN

Figma, UI/UX Design, Material UI (MUI), Ant Design, Styled Components

EDUCATION

Bachelor's degree - Management Information Systems - 2010

União Educacional de Brasília - UNEB

Associate's degree - Data processing - 2010

União Educacional de Brasília - UNEB
